

How To Generate With AI In InfixLMS

InfixLMS provided Open AI with better Content requires fewer resources, goes to a new level of quality, and becomes a more personalized LMS system. Open AI plays a huge role in Infix e-learning. Although artificial intelligence is becoming more aware of what users think and do, it is able to analyze what kind of content users prefer and consume.

Open AI Setup:

Open AI is a powerful tool that provides access to a range of high-powered content-learning models in InfixLMS. This OpenAI can create Couse titles, blog posts, and other descriptions that enable humanizing AI experiences, and build applications that extend the power of human language.

Short Direction: {InfixLMS> Dashboard> AI Content> Setup> Open AI Setup> Open AI Model> AI Default Language> AI Tones> Max Result Length> AI Creativity> Open Secrete Key> Save.}

If you want to set on the Open AI for your InfixLMS system or want to generate your course, or blog post then go to the Admin panel to find the AI Content module to click on the Setup option.

- 1- Setup
- 2- Open AI Setup
- 3- Open AI Model
- 4- AI Default Language
- 5- AI Tones
- 6- Max Result Length
- 7- AI Creativity
- 8- Open secrete Key
- 9- Save it.

The screenshot displays the 'Open AI Setup' configuration page in the InfixLMS Admin Panel. The left sidebar shows the 'AI CONTENT' menu with 'SETUP' highlighted. The main content area contains several configuration fields: 'Open AI Setup' (labeled 2), 'OPEN AI MODEL' (labeled 3) with a dropdown menu showing 'Chat GPT', 'AI DEFAULT LANGUAGE' (labeled 4) with a dropdown menu showing 'English', 'AI TONES' (labeled 5) with a dropdown menu showing 'Professional', 'MAX RESULT LENGTH' (labeled 6) with a text input showing '200', 'AI CREATIVITY' (labeled 7) with a dropdown menu showing 'Medium', and 'OPENAI SECRETE KEY' (labeled 8) with a text input showing 'sk-Vd7Bna6K42dlF7whwP9ET38lbfJLkwr6k99pCmgoTU72uTl'. A 'SAVE' button (labeled 9) is at the bottom right. The footer shows 'Copyright © 2021 InfixLMS. All rights reserved | Made By CodeThemes'.

Here are the details of the AI tone & Open AI model section that are available for the user. Admin can use their one desire whatever they want to change the AI Tone & model.

The image shows two side-by-side panels. The left panel, titled 'AI TONES', has a search bar and a list of tones: FUNNY, CASUAL, EXCITED, PROFESSIONAL (highlighted), WITTY, SARCASTIC, FEMININE, MASCULINE, and BOLD. The right panel, titled 'Open AI Setup', has a search bar and a list of models: DAVINCI 3, DAVINCI, ADA, BABBAGE, CURIE, CHAT GPT (highlighted), GPT 4 (8K), and GPT 4 (32K). Red boxes and arrows highlight the 'AI TONES' and 'Open AI Setup' headers.

AI Content Re-Write:

AI Content rewriter tool that can help you take your content to the next level. It uses cutting-edge to analyze and rewrite your content, making it more engaging and effective. This section can also help you improve your writing style and grammar and ensure your content is error-free.

Short Direction: {InfixLMS> Dashboard> AI Content> Content> Generate Content List> SL> Template> Input> Output> Model> Tokens> Words> Temperature> Language> Select.}

If you want to change or re-write any of the content that you already generate by opening AI then go to the InfixLMS dashboard to find the AI Content.

- 1- Content
- 2- Generate a Content List
- 3- SL means serial number.
- 4- Template
- 5- Input
- 6- Output
- 7- Model
- 8- Tokens
- 9- Words
- 10- Temperature
- 11- Language
- 12- Select for Copy, edit or delete it.

The screenshot displays the 'Content' section of the InfixLMS Admin Panel. The left sidebar contains various navigation options, with 'CONTENT' highlighted under the 'AI CONTENT' section (callout 1). The main area shows a 'Generated Content List' (callout 2) with a table of generated content. The table has columns for SL, Template, Input, Output, Model, Tokens, Words, Temperature, and Lang, each with a dropdown arrow (callouts 3-11). An 'ACTION' column (callout 12) contains buttons for SELECT, COPY, EDIT, and DELETE. The table lists two entries: 'Course Title' and 'Course Requirements', both generated by 'Chat GPT' with specific parameters.

SL	Template	Input	Output	Model	Tokens	Words	Temperature	Lang
1	Course Title	python,java	Introduction to Programming with Python and Java	Chat GPT	9	200	High	English
2	Course Requirements	python,java	The course requirement for this programming class includes a proficiency in both Python and Java. Students must have a solid understanding of the syntax, data structures, and algorithms of both programming languages. Additionally, students must be able to apply their knowledge of Python and Java to solve complex programming problems and develop functional applications. It is expected that students will have prior experience with programming and have completed prerequisite courses in computer science. The course will require regular attendance, participation in class discussions, completion of assignments, and a final project that demonstrates mastery of Python and Java programming concepts.	Chat GPT	110	200	High	English
